OBJECTIVE

As afresher aspiring to embark on a career as a software developer, I bring a strong foundation in programming languages such as Java, along with practical experience gained through academic projects and internships. My educational background in computer science has equipped me with a solid understanding of data structures and software development principles. I am eager to apply my problem-solving skills and passion for coding to contribute effectively to a dynamic team. With a proactive attitude towards learning and a commitment to delivering high-quality solutions, I am excited about the opportunity to grow and make meaningful contributions as a software developer in a collaborative environment.

EDUCATION

.Vignan's foundation of science and tecnology JULY 2024 - present [vadlamudi]

Bachelor of Technology, Computer Science and Engineering

○ CGPA: 7.001/10.00

SR Junoir Collage Mar 2022 - May 2024 [Vijayawada]

– .Intermediate Education

– ○ Percentage: 96/100

ZP High school Mar 2021 - May 2022 [Veligandla]

– .Intermediate Education

– ○ Percentage: 85/100

PROJECTS

EXPENSE TRACKER EXPENSE TRACKER

An Expense Tracker is a simple web application built with HTML, CSS, and JavaScript that helps users manage their personal finances. It allows them to record daily expenses by entering details such as amount, category, and date, and then displays the entries in a structured list. With JavaScript, the app automatically calculates the total spending and provides a summary of expenses by category, while CSS ensures the interface is visually appealing and easy to navigate. This project is beginner-friendly and demonstrates how front-end technologies work together to create a practical tool for monitoring and controlling spending habits.

LIVE WHETHER WEB LIVE WHETHER WEB TRACKER

A Live Weather Web Tracker is a web application built using HTML, CSS, and JavaScript that allows users to check real-time weather updates for any city. By entering a location, the app fetches live data from a weather API and displays details such as temperature, humidity, wind speed, and weather conditions. JavaScript handles the API requests and updates the interface dynamically, while CSS ensures the design is clean and user-friendly. This project demonstrates how front-end technologies can be combined with external APIs to create an interactive and practical tool for everyday use.

SKILLS

- Programming Languages : CORE JAVA,SQL,OOPS.
- WebTechnologies: BASICS OF HTML and CSS, JAVASCRIPT
- Database Systems:: DATABASE SYSTEMS,OPERATING SYSTEMS
